PROFILE

Product Support Specialist with four years of hands-on experience troubleshooting hardware, software and connectivity issues and owning escalated cases through to confirmed resolution. At Bucher Aerospace, built a searchable issue-and-resolution database that improved team efficiency by 20% in six months, and writes the FAQs, user guides and knowledge base articles colleagues rely on. Holds Google and Microsoft cybersecurity credentials, Google Cloud and Splunk certificates and a University of Washington full-stack certificate, with CompTIA Security+ in progress (target March 2027). Builds and secures real systems on AWS and Azure, and shipped Wachara Wi-Fi, a live pay-as-you-go hotspot platform with M-Pesa payments.

PROFESSIONAL EXPERIENCE

Product Support Specialist

Bucher Aerospace Corporation, Everett, WA | November 2024 – Present

- Provide front-line and escalation support for aerospace products and internal users, from intake through confirmed resolution.
- Built a searchable database of recurring technical issues and proven resolutions, improving team efficiency by 20% within six months.
- Author FAQs, user guides and knowledge base articles so recurring problems are resolved at first contact.
- Coordinate with engineering, quality and operations teams to close cross-functional product and system issues.
- Use AI assistants for documentation drafting, case summaries and troubleshooting research; keep accurate case records.

Delivery Associate

Globalize Solutions, Everett, WA | October 2022 – October 2024

- Operated handheld GPS and scanning technology on a full independent route, diagnosing device and connectivity faults in the field.
- Managed customer contact for scheduling and exceptions, with accurate confirmation records for every stop.
- Contributed to route optimization research that improved delivery efficiency.

Machine Operator

Clearwater Spas, Arlington, WA | January 2020 – October 2022

- Operated production machinery at 100% quality output against documented standards.
- Trained new operators and wrote procedural guidance for repeatable quality.
- Worked with engineers and designers to correct recurring equipment and process faults; earned multiple performance-based pay increases.

Project Manager

Independent Contractor Management, Kenya and Uganda | January 2016 – January 2019

- Managed projects from conception through implementation, including planning, budgets and records.
- Carried out equipment quality assurance and testing so installations stayed serviceable after handover.
- Handled customer product sales and long-term client relationships.

TECHNICAL PROJECTS

- **Wachara Wi-Fi** (live: wachara-wi-fi.vercel.app): pay-as-you-go hotspot for a Kenyan village: captive portal, M-Pesa STK Push, MikroTik control, admin dashboard. Node.js, Express, MySQL, Nginx.
- **Azure VM with Nextcloud:** server secured with Network Security Groups.
- **AWS EC2 and VPC:** WordPress on EC2; VPC with subnet and security configuration.
- **InterActor:** MERN app using the TMDB API (UW capstone).

TECHNICAL SKILLS

- **Support:** escalation and case management, troubleshooting, ticketing, root cause analysis, knowledge base and SOP writing
- **Systems:** Windows, macOS, Microsoft 365, mobile devices, peripherals, device deployment
- **Data and dev:** SQL, Python, MERN stack, React, Node.js, MongoDB
- **Cloud and security:** AWS EC2 and VPC, Azure VMs and NSGs, Splunk, incident response fundamentals, identity and access
- **Business tools:** Asana, Syspro, Odoo

SOFT SKILLS

- Clear written communication
- Ownership of escalated cases
- Cross-team collaboration
- Training and mentoring
- Calm problem solving
- Customer service
