IT Support | Technical Support | Cybersecurity | AI

PROFESSIONAL SUMMARY

Technical support professional with four years of experience troubleshooting hardware, software and connectivity issues and owning escalated cases through to resolution. Built a searchable issue-and-resolution database that improved team efficiency by 20% in six months, and writes the documentation colleagues rely on. Holds Google and Microsoft cybersecurity certificates, Google Cloud credentials and a University of Washington full-stack development certificate, with CompTIA Security+ in progress. Comfortable across Windows, macOS and Microsoft 365, writes SQL and Python, and has hands-on lab experience in AWS and Azure.

CORE SKILLS

Support: escalation and case management, hardware and software troubleshooting, help desk procedures, ticket documentation, root cause analysis, vendor coordination, customer service by phone, email and in person
Systems: Windows, macOS, Microsoft 365, Microsoft Office, mobile devices, printers and peripherals, device deployment, scanning and handheld equipment
Data and development: SQL, Python, MERN stack web development (HTML, CSS, JavaScript, React, Node.js, MongoDB), reporting and analysis
Cloud and security: AWS EC2 and VPC, Azure virtual machines and Network Security Groups, Splunk, security monitoring and incident response fundamentals, identity and access concepts, security awareness training
Documentation and process: knowledge base articles, user guides, FAQs, SOPs, workflow administration in Asana, training new staff
Languages: Dholuo (native/bilingual), Luganda, Swahili, English (all full professional), French (elementary)

PROFESSIONAL EXPERIENCE

Product Support Specialist
Bucher Aerospace Corporation, Everett, WA | November 2024 - Present
- Provide front-line and escalation support for aerospace products and internal users, troubleshooting hardware, software and connectivity issues from intake through confirmed resolution.
- Built a searchable database of recurring technical issues and proven resolutions, improving team efficiency by 20% within six months.
- Author FAQs, user guides and knowledge base articles so recurring problems are resolved at first contact.

- Coordinate with engineering, quality and operations teams to close cross-functional product and system issues.
- Handle sensitive customer and product information with discretion, and maintain accurate case records for traceability.

Delivery Associate
Globalize Solutions, Everett, WA | October 2022 - October 2024
- Operated handheld GPS and scanning technology across a full independent route, diagnosing device and connectivity faults in the field.
- Managed direct customer contact for scheduling and exception resolution, with accurate confirmation records for every stop.
- Contributed to route optimization research that improved delivery efficiency.

Machine Operator
Clearwater Spas, Arlington, WA | January 2020 - October 2022
- Operated and monitored production machinery at 100% quality output against documented standards.
- Trained new operators and produced clear procedural guidance for repeatable quality.
- Worked with engineers and designers to identify and correct recurring equipment and process faults.
- Earned multiple performance-based pay increases.

Project Manager
Independent Contractor Management, Kenya and Uganda | January 2016 - January 2019
- Managed projects from conception through implementation, including planning, budgets and record keeping.
- Carried out equipment quality assurance and testing so installations remained serviceable after handover.
- Handled customer product sales and maintained long-term client relationships.

EDUCATION
Certificate, Full Stack Web Development - University of Washington, Seattle, WA | July 2021 - January 2022
Bachelor of Science, Hotel Management and Catering - Nkumba University, Entebbe | 2009 - 2013

CERTIFICATIONS
- Google Cybersecurity Professional Certificate - Coursera, June 2023 to March 2024
- Microsoft Advanced Cybersecurity Concepts and Capstone Project - Coursera, May 2024
- Google Cloud Fundamentals: Core Infrastructure
- Google Cloud Security
- Splunk Master Certificate
- Asana Certified Administrator

- Asana Workflow Specialist
- Generative AI Bootcamp - Outskill, October 2026
- CompTIA Security+ - in progress

TECHNICAL PROJECTS
- InterActor - MERN stack web application using the TMDB API for collaborative movie exploration (University of Washington capstone).
- Deployed a WordPress site on AWS EC2 and built an AWS VPC with subnet and security configuration.
- Built an Azure virtual machine running a Nextcloud server, secured with Network Security Groups.
